

Experiment-2

Responsive Banking UI with Deposit/Withdrawal Buttons and Balance Display

Aim: Design a visually appealing and responsive banking user interface using only HTML and CSS, helping you practice modern layout techniques and styling without adding interactivity.

Task Description

Create a banking interface that includes:

- A balance display section (for example, a card or a highlighted box).
- A Deposit button.
- A Withdraw button.

The UI should:

- Be centred on the page.
- Use proper spacing and alignment to look clean and professional.
- Be responsive, adjusting gracefully on different screen sizes (desktop, tablet, mobile).

INPUT SCREENSHOTS:
